

Flight  
Vector 1

This is a mirror image of the wind  
vector to force the black line to  
intersect with the flight vector.

Flight  
Vector 2

Wind  
Vector

Wind  
Vector

Flight  
Vector 3

Flight  
Vector 4

Black line is perpendicular to flight  
vector and intersects with wind vector.  
The angle between the black line and  
the flight vector is 90 degrees. We  
need to find the angle between the  
black line and the wind vector.
